

C-4000™

IMERYS C-4000™ muscovite mica is a micronized product which is mined and processed in Kings Mountain, North Carolina.

Manufacturers specify muscovite mica for applications requiring reinforcement and where greater resistance to moisture, heat, light or chemicals is needed. As a platy mineral, Imerys muscovite mica offers beneficial rheological properties and is chemically inert. Muscovite mica is specified to brighten the tone of colored pigments and to offer decorative effects. These properties render Imerys muscovite micas excellent functional minerals for paint, coatings, joint compounds, plastics, rubber, sound deadening, and many other applications.

IMERYS C-4000 mica has a moderately high aspect ratio and is used in a broad range of applications, including:

- Paint and Coatings: Provides improved barrier properties (MVT), promotes adhesion, reduces cracking and checking.
